JOB DESCRIPTION - LICENSED MILLWRIGHT

Under the guidance of the Technical Services Team Lead, the Industrial Millwright will play a role in installing, maintaining, repairing, and troubleshooting industrial machinery and mechanical equipment. They interpret blueprints, assemble machinery, perform preventive maintenance, and ensure equipment operates efficiently and safely to minimize downtime and increase efficiency and productivity.

This role is located on-site in London, Ontario.

SHIFT STRUCTURE: TBD

RESPONSIBILITIES:

- Train with vendors, including software training (PLC, HMI, VFD, etc.).
- Assist in setting up the PM program and spare parts inventory system.
- Build a CMMS system and create work instructions, SOPs, and other documents.
- Promote Health and Safety, Food Safety, and GMP culture.
- Drive Lean practices to reduce waste and improve efficiency.
- Liaise with leadership to provide best practices and analyze uptime/downtime impact.
- Inspect incoming equipment, assemble machinery, and repair new equipment.
- Read and interpret blueprints, diagrams, and manuals.
- Move, assemble, troubleshoot, and repair various machinery.
- Fabricate, weld, and machine new parts as needed.
- Perform planned preventative maintenance and emergency repairs.
- Monitor the maintenance program and provide recommendations.
- Lead apprentices and direct them as required.

REQUIREMENTS:

- 1+ years of experience as a Licensed Millwright 433A.
- Experience with Allan Bradley PLCs, drives, RSview, and Fanuc robotics is an asset.
- Continuous improvement mindset with a willingness to learn Lean Manufacturing.
- Ability to work independently and collaboratively in a fast-paced environment.
- Strong time management and prioritization skills.

Aspire welcomes and encourages applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.
